Play Therapy Workshop 2017-2018 aims at create a space for smaller size of healthy practices in group process. The group will first run for a year, 20 sessions at week three and fourth, twice a month. To develop a intensive creative and self-own of the group sand tray process together as well as a study group of sand knowledge and facilitation.

The group size is mainly a closed group of six. Group supervision could be maximum of ten.

Each equally and responsible to take up facilitation process together. The main facilitator is responsible to one sand tray process with group mates as well as present a case on the following week.

The other week is basic concept and study of related articles and books together. The sharing and bio-positive feedback is encouraged.

The characteristics of the group is a life-lively group process, basic on experiential group process on play in the sand tray. Each will fully engaged and experienced the inter and intra-dynamic among group mates. The studying of articles and books keep good practices on the track with fully supported daily cases practices.
